

Environmental Risks

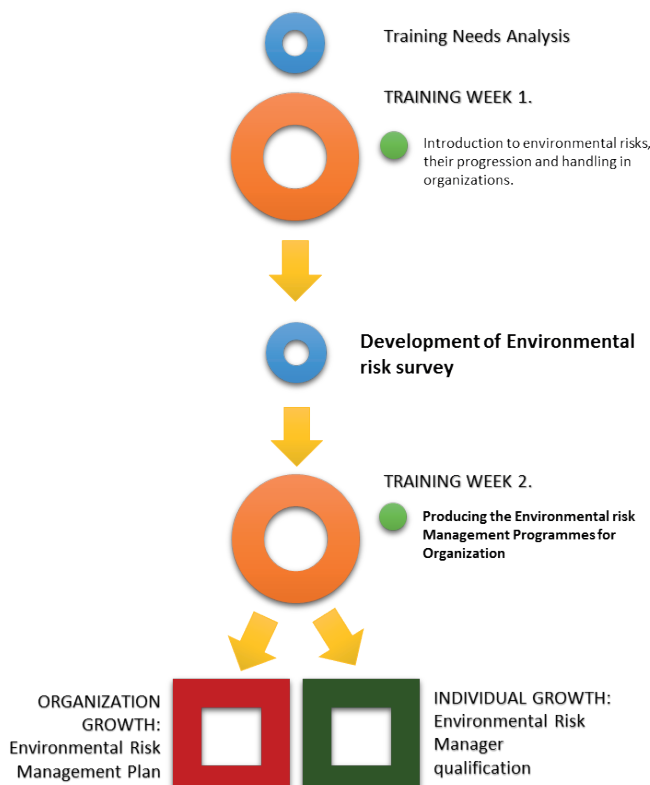

Learn how to make effective Environmental Risk Surveys and Programmes

Environmental Risk Manager ENVIRONMENTAL RISK MANAGEMENT TRAINING PROGRAMME Training for Organization Developers

The ENVIRONMENTAL RISK MANAGEMENT TRAINING is aiming for understanding and managing the environmental risks in organizations. The underlying goal is to give knowledge, tools and skills how to manage environmental risk and to motivate organizations taking the environmental risks in control.

CHALLENGE	SOLUTION: TRAINING FROM TAKK
How to start environmental risk management process in organizations?	Learn how to make efficient environmental risk surveys for organizations
How to make sure that right things are developed in risk management?	Learn to analyse properly the environmental risk survey data
How organizations can handle and develop their environmental risks?	Learn how effective environmental risk management programmes are developed

BENEFITS OF THE TRAINING

- The Trainee is able to develop organizations waste management with quality and efficiency.
- The organization receives expert who can plan proper waste management for organizations and reduce their waste production. This will be beneficial to revenue as the recycled materials can be used as raw materials. Solid waste sorting and recycling is good for environment, public health and for company image.
