

# Resource Efficiency Manager

## RESOURCE EFFICIENCY TRAINING PROGRAMME

### Training for Organization Developers

The RESOURCE EFFICIENCY TRAINING PROGRAMME aims at understanding and managing the resource efficiency issues in organizations. The underlying goal is to give knowledge, tools and skills how to manage resources and to motivate organizations taking the resource issues in control.

PROBLEM	SOLUTION: TRAINING FROM TAKK
How to define resource efficiency?	Learn the basics of resource efficiency and theories
How to start resource efficiency process in organizations?	Learn to develop resource efficiency current state analysis for organization
How organizations can handle and develop their resource efficiency?	Learn how effective resource efficiency programmes are developed

#### BENEFITS OF THE TRAINING

- The Trainee is able to develop organizations resource issues with quality and efficiency.
- The organization receives comprehensive current state analysis of their resource efficiency. Based on the analysis the Trainee will build up proficient resource efficiency Programme for the organization which will lead to savings (energy and material reductions etc.) and image benefits (marketing opportunities).
