# Well-being from TAKK

## Practical Nurse

### Training

- The compulsory modules: Support and guidance of growth, Nursing and care, Rehabilitation support.
- The most common study programmes Rehabilitation, Children's and Youth Care and Education, Mental Health and Substance Abuse Welfare Work, Nursing and Care, Care for the Disabled and Care for the Elderly.
- Programme content 50 % on-the-job training

### Benefits of the Training

- Employer gets ethically responsible practical nurses who have holistic approaches to patients' health.
- Practical nurse is also able to counsel and rehabilitate a patient.
- Practical nurse is responsible for patient's medical care.

## Nursing Assistant

### Assists the customer in everyday living

- cooking
- eating
- hygiene
- outdoor recreation
- housekeeping
- home maintenance
- gardening
- running errands
- inspirational activities
- assistive nursing care

### Training

- Includes 3/5 of a Practical Nurse's studies
- Focus is in the elderly care and in the care for the disabled
- Programme content 50 % on-the-job training

### Benefits of the Training

- Employer gets ethically responsible and aware nursing assistants
- Guarantee care-givers of equal quality for all types of clients
- Nursing assistants enable less expensive home care vs institutional care
- Option to continue studies to become Practical Nurse (two more modules)

N.B. Not responsible for medical care.
