坦佩雷应用科技大学概况-TAMK in a nutshell 2016

TAMK 位于坦佩雷市区中心地段，坦佩雷市是北欧最大的内陆城市，因其迅猛的现代化工业发展，被称为“北方的曼彻斯特”。随着国家 2020 愿景规划，坦佩雷正在打造智能城市，提升创新能力和国际竞争力。坦佩雷应用科技大学建校于 1912 年，历经百年发展，逐步形成了芬兰规模最大的应用科技大学之一，并连续多年被评为最受国际学生欢迎的大学。自建校伊始，TAMK 始终致力服务社会，特别是将服务地方经济发展视为己任。目前学校有在校生 10,000 余名，其中国际学生占 5%，教职员工 730 人，是芬兰“工程师”与“企业家”的摇篮。

办学理念： 实用知识的教育价值观

办学宗旨： 文理相通，注重通识教育与专业教育相结合。

强调理工与人文融通，博学与专精兼取，教学与实践并重。

社会责任： 为社会的利益而探索知识、发现知识和运用知识是 TAMK 的核心使命

TAMK 办学特色： 创新与企业家精神

TAMK 是一所重视应用技术和管理服务的重点大学。他在电气工程、机械设计与自动化领域处于全国领先地位。健康护理学院是芬兰重要的公共卫生管理及服务人才的培养单位。

2014 年，TAMK 与芬兰国家广播电视制作中心 Yle 合作，将艺术、音乐与传媒学院迁至 Mediapolis 芬兰最大的数字、网络、传媒工业枢纽中心，将学院师生融入于全国 30 多家顶尖级的影视传媒企业，并聘请公司业务高管兼职担任核心课程教学工作。

Pro-academy 是坦佩雷应用科技大学商学院的另一伟大创举。是一种创造性的“小而美”的企业家工作坊培养模式。每

年从商学院选拔出 20 名富有雄心壮志的年轻学子在大学第二年开始进入 Pro-academy 进行为期两年半的情景体验式学习。由学生自己投资组建一个实体公司，所有注册，财税，运作，管理完全依据于当前国际贸易法和公司法。学生对自己的公司自负盈亏，负有完全运营责任，并要求在毕业前将公司开拓到海外市场运作三个月作为毕业设计的一部分。教学实行导师协助培养方式，所有导师均有丰富的行业经验，或者本身就是企业高管。

TAMK 在七大领域开展本科与研究生教育

企业家是芬兰经济改革的驱动力，他们把新的思想、方法和先进的技术介绍给商界和市场，并进行创造性的工作。企业家的精神在 TAMK 随处可见。即使学生对商界很少感兴趣，TAMK 的企业家式的精神却鼓励学生进行有创造性的努力并为现代社会的各种问题产生新的解决方案。TAMK 因其灵活的办学思路，开创了具有高强度的、有创造力的和企业家式的现代大学运作模式。

坦佩雷应用科技大学全球教育中心（TAMK Global Education）致力于在全世界推广芬兰成功的教育改革经验。将芬兰现代化的教育理念、一流的办学思路、创造性的教学模式带给所有教育界的同仁。TAMK 始终坚信，教育是通往任何努力成功的唯一钥匙。

UNIVERSITY
OF TAMPERE

Teacher Education and Training (K-12)

University of Tampere addresses the central issues in contemporary society. The profile of the University of Tampere accentuates the university's multifaceted research and education on society and health.

By providing critical knowledge and education, the university helps people and societies to improve their health and their cultural, social and economic well-being. The basic values of the University of Tampere are academic freedom, creativity and social responsibility.

The University of Tampere educates shapers of the future, people who understand the world and will change it. The University emphasises the close connection between teaching and research, and the social impact of its activities. As such, the University values open and independent research, and provides researchers with the tools to make it happen.

The University is committed to multidisciplinary research, and to fostering opportunities for its researchers to do it. The goal is the establishment of an international academic community characterised by high-quality, original research with social impact. While new knowledge is founded on independent research and the free exchange of ideas and cooperation, it is also based on the will to solve problems and pursue new opportunities. Consequently, research and education are not defined by science alone, but also by reality as it is experienced. Phenomenon-based research breaks the conventional boundaries of disciplines and explores new interfaces and perspectives.

The School of Education at the University of Tampere is a research and learning community exploring and analysing changes in education and society. The School of Education promotes research that contributes to the better understanding about the conditions and possibilities of education in a time of global change. The school participates in building the idea of learning society both in national and global scale.

The School of Education educates highly qualified kindergarten teachers, class teachers (primary teachers) and subject teachers for K-12 level general education. It also educates experts of education in the public or private sector, and experts of speech technique and vocology.

The School of Education also offers international degree and training programmes with top-quality societal and cultural expertise for educational professionals.

To manage its international, commissioned training programmes, University of Tampere has created an organisation called Finland University (FINUNI) with two Finnish partner universities (Universities of Turku and Eastern Finland). In its operations Finland University actualizes the mission of these universities and supports the international dimension of their activities. Finland University works to benefit its owner universities and has no other stakeholders. All the international training programmes within University of Tampere liable to a charge are operated via Finland University.
